# Kular | Modern Ghost Theme

1. Introduce

Kular, the modern & responsive theme for Ghost Blog. It is designed to focus content, it suitable for blog, mini news page,...

Have fun - and let us know what you think

You're live! Nice. We've put together a little post to introduce you to the Ghost editor and get you started. You can manage your content by signing in to the admin area at `<your blog URL>/ghost/`. When you arrive, you can select this post from a list on the left and see a preview of it on the right. Click the little pencil icon at the top of the preview to edit this post and read the next section!

Getting Started

Ghost uses something called Markdown for writing. Essentially, it's a shorthand way to manage your post formatting as you write!

Writing in Markdown is really easy. In the left hand panel of Ghost, you simply write as you normally would. Where appropriate, you can use *shortcuts* to **style** your content. For example, a list:

- Item number one
- Item number two
    - A nested item
- A final item
